

MIZUE®

ULTRAFINE BUBBLE (UFB) SHOWER NOZZLE

Installation & User Manual

Transform your shower into a spa-like sanctuary.

Product Overview

Reimagine yourself transported to an ancient Japanese onsen, where time slows and the soul is renewed by sacred, healing waters.

Aquadei introduces Mizue®, a breakthrough in Japanese water technology.

By simply adding Mizue® to your shower, you'll awaken your skin's natural vitality and radiance. Feel the gentle, silky touch of water transformed — delivering deep, lasting hydration while infusing every drop with softness and life-giving energy that refreshes the body, mind, and spirit.

Experience a ritual reborn: glowing skin, youthful rejuvenation, and the pure bliss of being truly blessed by the water.

Key Benefits

- **Deep Hydration** – Ultrafine bubbles penetrate the skin's outer layer (stratum corneum), helping lock in moisture and reducing dryness greater than 40%.
- **Gentle Cleansing** – Dirt, oil and impurities are removed without harsh scrubbing or soap.
- **Gentle Warmth** – Elevates skin surface temperature for a soothing, spa-like feel.
- **Improved Scalp Health** – Resulting in hair that's shinier, silkier and easier to manage.

Installation Instructions

1. Turn off the water supply to your shower.
2. Remove the existing showerhead or nozzle from the shower arm.
3. Ensure the ½" NPT thread is clean and free of debris.
4. Wrap Teflon tape clockwise around the shower arm threads to prevent leaks (optional).
5. Hand-tighten the Mizue® UFB Nozzle onto the shower arm.
6. Re-install shower head on Mizue®.
7. Turn on water gradually and check for leaks.
8. Adjust nozzle direction as desired.

Note: Do not overtighten. Hand-tight is sufficient.

Maintenance

To maintain optimal performance:

- Periodically flush the nozzle with clean water.
- Avoid harsh chemical cleaners or descaling agents.
- If reduced flow is observed, soak the nozzle in a warm vinegar solution for 30 minutes to dissolve mineral buildup.

Performance Data Summary

Mean Bubble Size:	186 nm
Mode:	89.7 nm
Concentration:	2.2×10^7 particles/mL
Standard Deviation:	141.2 nm
Temperature:	26.4–26.5 °C
Measurement System:	NanoSight NTA 3.4 Build 3.4.4 using Blue405 laser

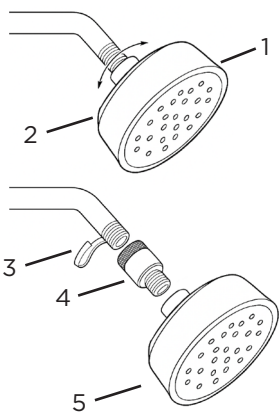

Troubleshooting

Issue	Possible Cause	Solution
Reduced water flow	Mineral buildup	Soak nozzle in warm vinegar for 30 minutes
No bubble output	Air trapped or improper fit	Reinstall nozzle and flush water line
Leaks at joint	Thread misalignment	Reinstall with Teflon tape and hand-tighten

Safety & Warranty

- Compatible with all standard ½" shower systems.
- **Warranty:** Aquadei offers a 30-day money-back guarantee on eligible products. Returns must be initiated within 30 days of delivery and received in original condition, with no visible damage. All returns are subject to inspection and approval by Aquadei. Return shipping costs are the responsibility of the customer, and original shipping and handling fees are non-refundable. Aquadei reserves the right to deny any return that does not meet these conditions. Refunds will be issued to the original payment method following approval.
- For support or replacements, contact info@aquadei.net or visit MyMizue.com or Aquadei.net.

Installation Diagram

Steps for installation:

1. Step 1 - Remove shower head
2. Step 2 - Clean threads on shower spigot
3. Step 3 - Install teflon tape on shower spigot
4. Step 4 - Instal Mizue® on shower spigot
5. Step 5 - Re-install shower head on Mizue®

Finished!
